

Dr. Gábor Gazdag introduction

My name is Gábor Gazdag. I am a psychiatrist by profession, graduated 31 years ago at Semmelweis University in Budapest. Currently I'm working in the Jahn Ferenc Hospital in Budapest as the head of the Center for Psychiatry and Addiction Medicine.

This hospital is a general hospital in the suburbs of Budapest. Our department has 120 beds and serves a catchment area of 400, 000 people. I am also a specialist of addiction medicine. In Hungary, one can get a specialization from addiction medicine too. Thus, I am also working with patients struggling with alcohol or drug problems.

I got my PhD degree in 2005. My thesis focused on ECT-related studies. In 2020, I was appointed a clinical professor of psychiatry at Semmelweis University.
