

## Dr. Vaughn McCall Introduction

I'm William Vaughn McCall, and I am a psychiatrist finishing his training in 1988, and my areas of expertise have been in severe mood disorders, sleep disorders, and catatonia, and the treatment electroconvulsive therapy, or ECT, is germane to both catatonia as well as the severe mood disorders. I'm presently on faculty at the Medical College of Georgia, where I previously served as the Chairman and Executive Vice Dean.
