

## Dr. Georg Northoff introduction

**Dr. Northoff:**

I'm Georg Northoff. I'm a medical doctor. I'm also a philosopher and neuroscientist. I have a degree in all fields.

As you hear probably from my accent, I'm originally from Germany, but now I'm 15 years in Canada. I hold Canada research here for brain and mind, and as a resident, I already detected some patients with catatonia and was fascinated by those symptoms because they are directly at the interface between brain and mind.
