

Dr. Neera Ghaziuddin introduction

My name is Neera Ghaziuddin. I'm a psychiatrist, both an adult and a child and adolescent psychiatrist. And I am a professor of psychiatry at the University of Michigan Ann Arbor.

I did my medical training in India, and then I did my psychiatric training and my child and adolescent training in England and the UK. Then I repeated my child and adolescent training because of the way licensing is set up in The United States at this institution, and then I stayed on the faculty.
